POLY SHEEN MULTI®
100% trilobal polyester

95 Cl A

The Pot of Gold is just beyond the Rainbow of Mettler.

Even the unique beauty of each rainbow cannot compare to the brilliance of Mettler's new multi color thread, Poly Sheen Multi®. Just as there are no two rainbows exactly alike, no two projects will appear the same when stitched with Mettler's new Poly Sheen Multi® color threads.

Appearing in 42 fashion-inspired ombre and variegated color combinations, Poly Sheen Multi® is perfect for many applications including quilting,

decorative embroidery and thread painting. The possibilities are limitless, beyond imagination even as color blending, shading and shadowing effects play on fabric colors and textures transitioning from one look to another.

Mettler's Poly Sheen Multi® thread transforms your creative vision into a reality of shimmering riches.

For information on spool sizes see inside.

Why Poly Sheen Multi® is so much stronger than viscose.

Special characteristics	Advantages
50% higher tensile strength plus an optimal elongation ratio.	High stitch consistency guaranteed – no interruptions in the stitching process due to thread breakage.
Extremely high friction resistance (high anti-raveling properties).	An exceptionally long life for all embroidery. A shine that always looks like new.
Higher washing, temperature and light fastness.	Embroidery stitches that stay absolutely colorfast, even when conditions are especially tough – such as chlorine bleach, wet or dry friction, washing and ironing.
Higher color fastness thanks to innovative color technology.	High brilliance for embroidery colors, so they are brighter and even more expressive.
Trilobal cross section.	As a result, Poly Sheen Multi® can hardly be distinguished from viscose, but is far easier to work with.
Universal use, even with textiles under heavy stress.	Use of the same embroidery thread for a wide variety of textiles.
Wide range of colors, 42 shades.	A choice of colors that leaves no wish unfulfilled.

Ultimate stitch consistency, also on the fastest, state-of-the-art sewing machines.

Technical details

For machine- and hand-sewing.
Including thread storage.
Recommended needle size: Nm 70–80.
